Twelfth Revision
June 1986

Preface

This revision of the Veterinary Services Animal Disease Thesaurus represents a continuing effort to delete unneeded terms, combine similar terms, and substitute or insert single words as they were suggested by coders, indexers and data bank users.

The rationale of the revision procedure is to preserve the general format, as derived from the 1971 Veterinary Subject Headings of the Commonwealth Agricultural Bureaux (England), and expand the numbers of hierarchical trees, consistent with the Veterinary Multilingual Thesaurus of the Commission of the European Communities (K. G. Saur Publisher; Munchen, New York, London, Paris, 1979).

Virus nomenclature in this issue is consistent with recommendations of the International Committee on Taxonomy of Viruses (ICTV) adopted by the World Health Organization (WHO).

The Thesaurus was first developed to fill the need for terms with which to index the veterinary literature for rapid retrieval of specific information on animal diseases exotic to the United States. It was later expanded to accomodate the coding of information on brucellosis, tuberculosis, pseudorabies and other diseases. This edition contains approximately 4,000 coded terms arranged in alphabetical and hierarchical sections.

The Animal Disease Thesaurus is continually revised, enriched, and updated with new concepts and scientific terms. Revisions are printed approximately annually. The user desiring additional information or updated copies of the thesaurus should contact:
